

Letter of Appreciation

Sunrise Foundation,

The Diqing Prefecture Tibetan Secondary School is the only full Secondary School in Yunnan that offers bilingual education in Tibetan and Chinese. Most of the boarding students are Tibetans who come from cold, remote mountain villages. Many of them are from poor families and it is not easy for them to pursue an education.

For the purpose of developing education among the minorities in frontier regions, Sunrise Foundation gave scholarships to 7 poor students from our school to ensure that they could complete their studies and realize their dreams. Five of these students are in Secondary 6 and the other two students are in Secondary 7. Each of them received an annual scholarship of rmb3,000. This financial assistance has allowed them to concentrate on their studies and greatly lessened the burden on their families.

Your love offering has deeply touched and encouraged us, motivating us to exert even greater effort to build a better school. We hope that the students would always remember the people who have extended to them this great, warm helping hand, and endeavor to excel in their studies and their character. We believe that in this environment of love, the students would develop into good contributors to society.

The school sincerely expresses its appreciation to you, and promises to be thus motivated to continually strive for better results.
